1. The following title is suggested:

Compact Fluorescent Light Fixture

Allowable Subject Matter

2. Claims 1-3 are allowed.

The prior art of record, including Kramer et al. (U.S. Patent No. 6,447,147 B1), Kassay et al. (U.S. Patent No. 5,528,473), Kassay et al. (U.S. Patent No. 5,523,931), Tickner (U.S. Patent No. 5,377,086) and Tickner (U.S. Patent No. 5,197,798 B1), does not show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose a compact fluorescent lamp fixture comprising:

- a concave outer optical surface extending intermediate a base end and a light emitting end as recited in Claim 1;
- a convex inner optical surface extending around the center line as recited in Claim 1; and
- a ballast mounted inside a dome-shaped housing receiving a plurality of compact fluorescent lights as recited in claims 2 and 3.

The above-indicated combination, including a combination of a concave outer, and convex inner optic surfaces; and positioning of a ballast within a dome-shaped housing receiving compact fluorescent lights, makes this invention unique.

Neither combined nor individual teaching of Kramer et al. (,147 B1), Kassay et al. (,473), Kassay et al. ('931), Tickner ('086) and Tickner ('798 B1) discloses a compact

fluorescent light fixture combining a concave outer, and convex inner optic surfaces; or positioning of a ballast within a dome-shaped housing receiving compact fluorescent lights. Thus, the above-indicated prior art does not meet the limitations of claims 1-3.

Therefore, claims 1-3 are allowed over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pelton et al. (U.S. Patent No. 5,651,609), Siminovitch et al. (U.S. Patent No.: 5,174,646) and Druffel et al. (US Patent No. 5,947,297)
